GUTTER MOUNT

Disclaimer

All rights reserved. No part of this website may be reproduced, translated, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the owner.

Review all instructions information carefully before installation.

Any damages, direct or incidental to the installer and/or property due to incorrect installation of any parts are the responsibility of the installer. Due to the various applications and fitment options available, the responsibility lies with the user to ensure all mounting points are secure and tight before every trip.

If unsure, consult with your Distributor regarding the operations of our products.

Users are advised to be mindful of the load they are carrying and drive in accordance with road conditions.

WARNING

Always wear appropriate PPE (Personal protection equipment) when fitting our products. Although the mounting kit is designed to be DIY, if you have any doubts or concerns, contact an accredited fitment centre to carry out the work. Alu-Cab will not be liable for any injury to persons, and/or damage to products and/or vehicles.

Installation Instructions

STEP
3

To prepare to mount the Gutter Mounts with Load Bar:

Ensure the Load Bar spans the width of the roof of your vehicle, and that both the slot and the through hole of the Gutter Mount Top Plate are secured to the load bar as seen in the illustration below.

Load bars are supplied on their own, without feet, in silver and black in lengths of 1250mm and 1450mm.

Figure 5: Load bar mounting to Top Plate

STEP
4

Installation Instructions

Mounting the Gutter Mount:

STEP
4.1

Place Mount Plate vertically in the gutter.

Align the Tension Plate to the Mount Plate via the cup square bolt.

Lightly attach the M8X20 button head bolt in the tension plate.

Tighten the cup square bolt so that the Mount Plate and Tension Plate are parallel.

Now tighten the M8 button head screw to clamp onto the gutter.

Figure 6: Mounting Gutter Mount

Installation Instructions

STEP
4.2

Check the M8 Nut and tighten accordingly.

Check the clamping by verifying the the 3mm rubber channel is compressed under the gutter.

Repeat on the opposite side, ensuring the Gutter Mounts are aligned.

Ensure that load bar is fixed on both the single hole and slot (Figure 5).
